

# Little Petroglyph Canyon

April 22, 2007

On April 22 six society members attended the tour to see "the highest concentration of **rock art** in the Western Hemisphere" in the rugged volcanic Coso Range of the Upper Mojave Desert, on the test ranges of the Naval Air Weapons Station (NAWS), China Lake, California. The area boasted of well over 6000 images bighorn sheep, snakes, atlatls, anthropomorphic figures and abstract 'entopic' designs. This must to be true. Standing at any point in the canyon there was an overwhelming number of images.
